EDUCATION

St. Peter's Engineering College

CSE(Artificial Intelligence & Machine Learning) B. Tech

CGPA: 8.92

Hyderabad

November/2022 - April/2026

SR JUNIOR COLLEGE

MPC Intermediate

Percentage: 97.7%

Rangaraopalli,Kurikial

June/2020 - May/2022

SIDDARTHA HIGH SCHOOLS

General Curriculum Secondary School Certificate

CGPA: 10

Karimnagar

March/2020

SKILLS

Programming Languages: Python, Java, C
Libraries/Frameworks: Javascript
Tools / Platforms: Git, VS Code, Eclipse, IntelliJIdea
Databases: SQL

PROJECTS / OPEN-SOURCE

(1)PREDICTING PATIENT RE-ADMISSION RISK USING DEEP LEARNING *Deep learning models like RNN, LSTM, and Transformers were used to predict 30-day readmission using EHRdata.*

- With this Project i was aiming to solve 30-day hospital readmission for diabetic patients using deep learning on Electronic Health Record(EHR)data.
- It uses LSTM and Transformer models for accurate prediction, with
- SHAP/LIME for explainability and privacy-preserving techniques for secure deployment
- SMOTE handled class imbalance, and SHAP/LIME provided model explainability.
- Federated Learning and Differential Privacy ensured patient data security

(2)AI POWERED STUDENT ATTENTION TRACKER

OpenCV,SQLite,Matplotlib,CSV

- With this Project i was aiming to build the
- Monitors student attention in real-time using face detection, eye tracking, and head pose estimation.
- Offers multiple modes:
 - Simple Demo Lightweight basic attention tracking.
 - Enhanced Tracker Full tracking with analytics and session logging.
 - Analytics Module Generates graphs, trends, and performance reports.
- Logs session data in SQLite and supports CSV/JSON exports for external analysis.
- Provides visual alerts, interactive dashboards, and real-time attention indicators.
- Tracks look-away incidents, attention streaks, and performance patterns.
- Produces detailed session reports and daily/weekly trend analyses.
- Cross-platform (Windows/macOS/Linux) and lightweight for smooth performance.
- Useful for students, educators, professionals, and researchers to monitor engagement and focus.

CERTIFICATIONS

- Javascript Fundamentals for Beginners - **Udemy**
- Java - **DataFlair**
- Python Programming: The complete Beginner to Advanced - **Udemy**
- Data Analysis and Visualization with Power BI - **Coursera**
